Preface

The CUMULATIVE INDEX TO NURSING & ALLIED HEALTH LITERATURE (CINAHL) is a comprehensive and authoritative index to current periodical literature for nurses, allied health professionals, and others interested in health care issues. Approximately 300 nursing, allied health, and health-related journals are regularly reviewed and indexed for inclusion in CINAHL's five bimonthly issues and cumulative bound volume. Indexing also includes pertinent articles from 2600 biomedical journals indexed in INDEX MEDICUS as well as relevant material from popular journals.

CINAHL, the first index to periodical literature in nursing, began in 1956 and is the only index to nursing periodicals for the years 1960 to 1965. Currently, CINAHL indexes the majority of nursing periodicals published in English. Also indexed are publications of the National League for Nursing, the American Nurses' Association, and since 1972, the state nursing associations, as available.

Keeping pace with the trend toward the multidisciplinary approach to health care, CINAHL in 1977 extended its coverage of allied health. It is currently indexing primary journals for the following allied health fields: cardiopulmonary technology, emergency services, health education, health science librarianship, medical and laboratory technology, the medical assistant, medical records, occupational therapy, physical therapy and rehabilitation, physician's assistant, radiologic technology, respiratory therapy, social service in health care, and surgical technology.

Criteria for Selection of Materials

A. Articles from nursing and allied health journals which meet the following criteria:
   1. Original, substantive signed, and selected unsigned, articles.
   2. Editorials of national and international scope and interest.
   3. Biographies and obituaries with substantive background materials. Reports about outstanding nurses and allied health professionals.
   4. Reports of national and international organizations and conventions which have comprehensive information or content.
   5. Important national legislation regarding basic changes pertinent to health professionals or regarding major health plans.
   6. Poetry, if considered pertinent.

B. Articles from medical science journals, management journals, and from selected popular periodicals with nursing or allied health content, or otherwise of interest to the professionals in those fields.

C. Serials and pamphlets published by the American Hospital Association, Division of Nursing; the American Nurses' Association; the National League for Nursing; and the United States Department of Health and Human Services, Division of Nursing.

D. New books submitted by publishers, and listed by CINAHL subject headings.

E. Types of materials NOT included in the Index:
   1. Information of dated or transient nature, e.g. news items, notices of meetings, elections, committee activities.
   2. Abstracts, briefs, summaries.
   3. Financial reports, resolutions and bylaws.
   4. Editorials of local interest; letters to the editor.
   5. Promotional or parochial articles.

How to Use the Index

Beginning a CINAHL Search . . . with the Preliminary Pages

The preliminary pages of all issues include information important to the effective use of the Index. These contain the Criteria for Selection of Materials Indexed, this "How to Use the Index" guide, a list of journals regularly indexed, an ancillary list of journals from which articles are selectively indexed, and a list of abbreviations used in U.S. Government publications.

Included also are addresses of publishers submitting to CINAHL new nursing and allied health books. These books are listed in the Appendix Section according to CINAHL Subject Headings.

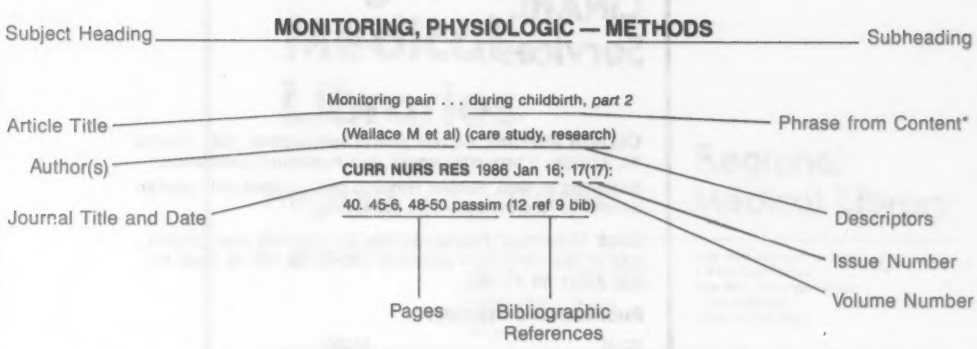
In addition, each Annual Cumulation contains:

Journal addresses, guide to Regional Medical Libraries, and the list of Subject Headings or "Yellow Pages" (includes Cross References and Tree Structures).

Beginning a CINAHL Search . . . by Subject

Start every search with the current Subject Heading List, or "Yellow Pages" (includes Cross References and Tree Structures). Then work forward through the current bimonthly issues and/or back through earlier volumes. Consult the "Yellow Pages" in each volume for detailed information about that year's subject headings.

CINAHL Editors and Indexers have the unique freedom to establish new subject headings responsive to rapidly changing concepts and trends. Indexers assign to articles as many subject headings as are necessary to provide easy access to the literature.



Beginning a CINAHL Search . . . by Author

Since 1967, Vol. 12, the Author Section follows the Subject Section. Before 1967, authors appear interfiled alphabetically with subjects.

Interpreting the Citation

As of 1981, the sequence of bibliographic data within each citation conforms to the standards for bibliographic references as established by the American National Standards Institute. The following page of examples will assist the user in interpreting subject and author citations.

Citation Examples

The Author Section lists a maximum of three authors, indicating additional authors by **et al.**

LIGHT KE, NUZIK S, PERSONIUS W et al: Low-load prolonged stretch vs. high-load brief stretch in treating knee contractures (research) **PHYS THER** 1986 May; 64(3): 330-3 (16 ref)

Author "See" references listed alphabetically for the second and third authors.

NUZIK S See: LIGHT KE

"See also" references direct the user from a general term to a more specific term (See Subject Heading List)

KIDNEY FAILURE, ACUTE
see also **HEMODIALYSIS**

"See" references direct the user from terms **not** used to terms used (See Subject Heading List)
